OBJECTIVE

Full-stack web developer specialized in the MERN stack. I have practical experience gained through my own projects, specializing in e-commerce and educational applications. I have built a complete point-of-sale system with an integrated payment gateway and designed integrated data structures for an educational platform that is still under development.

EDUCATION

Higher Diploma in Computer Science

2 Years - Expected 2026

Higher Institute for Statistical Studies and Research – Computer Science Department

PROJECTS

Full-Stack Developer (MERN) – POS System

Aug 2026

[Live Demo](#)

Independent MERN Stack Project

- Built a complete MERN Stack Point-of-Sale system (React, Node.js, Express, MongoDB) covering authentication, inventory, sales, and reporting.
- Integrated the **Baymob** online payment gateway for secure electronic payment processing.
- Resolved **20+ bugs** across routing, authentication middleware, Mongoose models, and controller logic through structured debugging.

Front-End Developer – ADAN (Animal Disease Alert Network) (Graduation project)

May 2026

[Live Demo](#)

Disease tracking and reporting platform – React (Material UI) + PHP

- Independently built the **complete React front-end**: authentication flow with OTP scaffolding, dashboard analytics (Recharts), disease reports, animal records (CRUD), vaccine scheduling, and a disease map (React-Leaflet).
- Connected the front-end to a PHP-based back-end API for core data operations.

EXPERIENCE

Web Designer Trainee – Digital Egypt Youth Program

Aug - Sep 2025

National Telecommunication Institute (NTI) | Ministry of Communications and IT

- Completed **120+ hours** of training (90 technical + 30 freelancing) covering HTML5, CSS3, JavaScript, and Bootstrap.
- Built a promotional landing page for an advertising studio (“Bonnie & Clyde”), applying layout, typography, and responsive design.
- Developed an interactive 5-image auto-slider with manual navigation, adjustable speed, and play/pause controls. Final score: **88%**.

SKILLS

Programming Languages JavaScript (ES6+), C++, C (Basics)

Frameworks & Libraries React.js, Node.js, Express.js, MongoDB, Mongoose

Web Development HTML5, CSS3, Bootstrap, Tailwind CSS, REST APIs, Responsive Design

Tools & Methodologies Git & GitHub, VS Code, Agile/Scrum, Unit Testing

Soft Skills Problem-Solving, Self-Learning, Attention to Detail, Team Collaboration

LANGUAGES

Arabic – Native | English – Intermediate level with a desire to improve
